

# Astro Cartography - Around the World with Astrology

You may already be familiar with your birth chart and the power of astrology for boosting your self-awareness and helping with timing as well as many other benefits. As astrologers, we employ many techniques for helping you in self-discovery, finding purpose and timing when to make certain moves. Relocation astrology further boosts your self-empowerment by telling you how you feel and fare when you're in a particular location on the globe.

If you have travelled around your country, or the world, then you already know that you can feel very different in different places. And Astro cartography, can allow you to gauge how your energy could shift depending on where you travel or relocate. You could pinpoint where you might feel at your most creative or where you could be more likely to meet the love of your life. You can use this valuable tool to plan your travel or next move. In fact, you don't even have to move. You could reach out to people in various places to connect in ways that boost you personally or professionally or learn more about why certain nationalities are part of your ancestry or current network. It really is magical.

Once you have your birth details, you're ready to dip your toe into Astro cartography.

You can book your session with me online [www.seeingwithstars.net/consultations/booking-form/](http://www.seeingwithstars.net/consultations/booking-form/) or email me at [seeingwithstars@gmail.com](mailto:seeingwithstars@gmail.com)

Astrocartography, or locational astrology, is a system that was developed in the early 1900s by various astrologers and then popularised in the 1970s by astrologer Jim Lewis. It involves placing your astrological birth chart on a map of the world to see which places light up with different planets.
